If it's not sustainable, why do it?

At Moffat, we aim to inspire chefs, bakers, and cooks to create a more sustainable world by equipping them with the best tools powered by renewable energy.

As innovators of world class cooking technology, we've taken up the challenge to reduce the environmental consequences of what we do. It's an evolving process of reducing our carbon footprint that's as much about elevating the performance and longevity of these products as it is about how they are made, packaged, delivered.

We are lucky that the heart of our operation is powered by renewable energy. The majority of electricity supplied to Moffat's New Zealand manufacturing facility in Christchurch is generated from hydroelectric power stations on South Island dams. These hydro dams are replenished by rainfall to provide a natural energy source with significantly lower greenhouse gas emissions than any fossil fuelled power alternative.

Our efforts to lift environmental performance are ongoing as we develop new processes and technology. At the same time, we encourage food service professionals to reduce their own carbon footprints by making the transition to more sustainable electric platforms.

Built to Last.

Blue Seal units are finished in heavy gauge 304 grade stainless steel. Fully framed doors incorporate a new heavy-duty hinge system, and our ranges are all built on a galvanised steel chassis. The superb finishing that is a hallmark of Blue Seal products includes fully welded seams and bullnoses, and polished stainless-steel surfaces.

Cook and Chill.

New inline refrigeration units mean raw ingredients can be contained and cooked in one place. Electric Cooktops, Griddles, and Chargrills can all be matched with 900mm or 1200mm gastronorm refrigeration bases, available in a two GN 1/1 drawer.

A Griddle Where You Need It.

A Blue Seal Griddle Plate in 300, 600, or 900mm can now be fitted anywhere in your Electric Cooktop layout. They are available with smooth or ribbed surfaces, or a combination of both.

Hygiene Down the Line.

Rounded corners and edges (internal and external) and streamlined top surfaces make for effortless cleaning and wiping down of an entire cooking line.

Service on the Fly.

Blue Seal design allows each unit to be serviced and maintained in situ, minimising the need to remove it or shut down an entire cooking line.

SING FROM THE **COOKTOPS.**

Induction Cooktops 450mm and 900mm

Stop jiggling the pans and fussing over temperature settings. The extended range of Evolution Series Induction Cooktops delivers all the power and precision you need to keep those brilliant ideas simmering.

Blue Seal functionality includes powerful new 5.0kW variable heat zones set beneath a heavy-duty 6mm ceramic glass glide top for effortless movement of pans. Auto pan detection keeps the kitchen cooler by turning off the heat when pans are removed.

Available in 450mm and 900mm widths, with round and full area induction zones, Evolution Series Induction Cooktops can be supplied with suite matching modular cabinet bases, including shelves and adjustable feet as standard.

Induction Cooktop Standard Features

- Heavy-duty construction
- Automatic pan detection switches induction zone off when pan removed
- 3 models of base unit
- Stainless steel exterior
- Fully modular
- Easy clean, installation and service

THE DIFFERENCE IS **ELEMENTARY.**

Sealed Hob Cooktops 300mm, 600mm and 900mm

The Blue Seal Electric Sealed Hob Cooktops are a new take on traditional elements offering superior hygiene and easier cleaning.

Sealed cast iron 2.6kW hot plate elements direct boilovers and spillages to flow down the sides of the element onto the stainless-steel cooktop surface where they are easily wiped away at the end of service.

Sealed Hob Cooktop Standard Features

- Heavy-duty construction
- 2.6kW cast iron hot plate elements
- Bench model only (300mm)
- 3 models of base unit (600mm)
- 4 models of base unit (900mm)
- Stainless steel exterior
- Fully modular
- Easy clean, installation and service

MEET THE **MOTHER OF INDUCTION.**

Induction Range Convection Oven 900mm

For the first time, Blue Seal has introduced the 900mm Induction Range with Convection Oven – a veritable powerhouse that food service professionals have long been waiting for.

It combines the best of all worlds, delivering speed and precision up top with a choice of round or full area induction cooking zones in 3.5kW or 5kW. And thanks to some clever design there's no compromise on space down below where a full size 6.1kW 2/1 GN convection oven is ready to perform with typical Blue Seal dependability.

Induction Range Standard Features

- Heavy-duty construction
- Four induction zones
- Automatic pan detection switches induction zone off when the pan is removed
- GN 2/1 6.kW electric convection oven
- Dual oven circulation fans
- Drop down door
- Stainless steel exterior
- Fully modular
- Easy clean, installation, and service

NOTHING LESS THAN **SOLID PERFORMANCE.**

Electric Solid Top 900mm
Electric Solid top Oven Range 900mm, static or convection.

The new Evolution Series 900 Electric Solid Plate sets a new benchmark in heat control and rapid recovery.

Precise temperature settings across four independently controlled electric heat zones make it the consummate multitasker capable of handling any job from large pot boiling to small pan finishing.

Electric Solid Top Standard Features

- Heavy-duty construction
- 10.8kW solid hot plate
- 750mm x 570mm cooking area
- Four independent heating zones (2.7kW)
- 16mm thick 16Mo3 chrome moly steel plate
- 3 models of base unit
- 1 model of refrigerated base with two GN 1/1 drawers
- Fully modular
- Easy clean, installation and service

Electric Solid Top Oven Range Standard Features

- GN 2/1 6.5kW electric static or convection oven
- Drop down door

ELECTRIC

A UNIVERSAL **WORKSTATION.**

Electric Griddles 600mm, 900mm, and 1200mm
Electric Griddle Ranges 900mm, static or convection

An Evolution Series Griddle offers precise temperature control and even heat distribution across the 20mm solid hotplate make the Evolution Series Electric Griddle a versatile addition to any food production line when reputation depends on consistent results.

Griddle plates are available with ribbed or smooth finish (or both) and a choice of mild steel or mirror chromed finish easy cleaning and superior heat transfer.

Electric Griddle Standard Features

- Heavy-duty construction
- Thermostatic control
- 20mm thick machined top plates
- Top weld sealed plates
- Stainless steel grease drawer
- 3 models of base unit
- 1 model refrigerated base with two GN 1/1 drawers (900mm, 1200mm)
- Stainless steel exterior
- Fully modular
- Easy clean, installation and service
- Choice of griddle surface – smooth, ribbed, or both

POWER TO THE **GRILL.**

Electric Chargrill 600mm and 900mm.

Evolution Series Electric Chargrills capture the tradition and authentic flavours of flame grilling but without the flames.

Searingly fast heat up times, uniform temperatures across the entire grill, and direct cooking on the elements for better heat transfer and even caramelisation make these a game changing addition for chargrilling consistency. A water pan located underneath the elements adds moisture to the cooking process.

The absence of a cast iron grate makes cleaning the electric chargrill a simple matter of turning the elements up to full power to burn off fats and other residue.

Electric Chargrill Standard Features

- Heavy-duty construction
- Direct contact cooking elements
- Fast response heating
- Up to 400°C cooking temperature
- No cooking grates required
- 13.4kW heating elements
- Separate left and right heat zones
- 3 models of base unit
- Stainless steel exterior
- Fully modular
- Easy clean, installation and service

ELECTRIC

FINISH AND GO.

Electric Salamanders 600mm and 900mm.

Blue Seal Evolution Series Electric Salamanders are versatile, easy to use and well equipped with performance features.

The E90Q features faster performance which comes from high-speed elements that heat up instantly and consume less energy while directing more heat to the cooking surfaces. All Blue Seal Salamanders can accommodate a Gastronorm GN 1/1 Tray.

E90Q Ultrarapid Electric Salamander Standard Features

- 4kW
- Self balancing adjustable grill height
- 1/1 GN pan compatible
- Infrared tungsten heating elements protected by a glass ceramic plate
- Ultra quick heating – 20 seconds to reach maximum temperature from ignition, max 5 seconds in operation
- Energy saving with ultra quick heating upon ignition
- Two independent cooking areas
- Large view digital display for timer countdown and easy to use control for time and cooking zone selection
- Perfect cooking uniformity with deflector and centering of the cooking plate under the heating elements
- Minimum heat dispersion - hot air is released towards the back reducing the temperature within the operating areas
- Insulated on external surfaces and handle for operator safety
- Open on 3 sides allowing easy loading
- Wall mounting bracket option
- Easy clean

E90QT - Contact version

- Enhanced energy saving with pan detection bar for automatic switching on and off

ELECTRIC

FRY **MORE.**

High Performance Electric Fryers 450mm and 600mm

The high-capacity 600mm Electric Fryers have joined the Blue Seal family. Available in single or twin pan configuration, with digital or manual controls, all models are equipped with powerful 22kW single flat bar elements that are simpler and easier to clean than traditional coiled elements.

The 600mm single pan options are designed for high production applications and can accommodate three standard baskets or two large. The twin models offer flexibility and economy of usage by allowing different foods to be fried in each side or one side to be turned off during quieter food service periods.

Electric 600mm Fryer Standard Features

- 22kW high performance single and twin pan fryers
- Easy clean flat bar heating elements
- Electronic thermostat or digital control
- Easy clean stainless steel open pan with
- 10 year limited warranty
- 35L oil capacity or twin pan 17.5L per pan oil capacity
- Insulated on external surfaces and handle for operator safety
- Stainless steel exterior
- Fully modular
- Easy clean, installation and service

FILTAMAX.

Filtamax is the ideal companion for Blue Seal Evolution Series Fryers because it enhances flavours by removing particles from the oil that would otherwise burn and taint the food. Filtamax works with premium vegetable oils and shortenings, extending the life of your oil and reducing the costs of replacement. It's easy to use – taking just 10 minutes to drain, filter and refill a 26-litre tank.

Filtamax Standard Features

- Heavy-duty 304 grade stainless steel finish
- Powerful reversible 1/3 HP pump
- Reusable filter bag
- Mounted on two fixed and two swivel castors
- Rigid delivery hose with heavy-duty insulated handle
- Easy clean, installation and service

THE PASTA **MASTER.**

Electric Pasta Cooker 450mm

Built for speed with its unique pan design, the Blue Seal electric pasta cooker is the wizard of high turnover pasta production.

From variable high boil to standby simmer, our patented infrared burner system maintains constant water temperature and enables faster turnaround through faster recovery times from low heat settings.

The cooker is equipped with six baskets to allow different pastas to be cooked at the same time.

Electric Pasta Cooker Standard Features

- Unique pan design
- Fine adjustment water faucet for pan filling
- Starch-skimming system for constant water freshness
- 316 grade stainless steel pan for extra resistance to salt effects
- Easy clean stainless steel open pan with 10-year limited warranty
- 25mm drain valve for safe and easy cleaning
- Six stainless steel pasta baskets for multiple pasta cooking
- Safety cut out thermostat for empty pan/water boil out
- Hinged basket drain stand
- Removable basket support grid
- Adjustable feet and additional rear rollers
- Easy clean, installation and service
