ATTENTION PLUMBERS:TYPICAL MOUNTING INSTRUCTIONS FOR:

GENERAL INSTRUCTIONS:

Thank you for purchasing one of our quality plumbing products. Most faucets are supplied with mounting hardware, including 1/2" nipples. For installation instructions we will assume that hot and cold water supplies end in 1/2" nipples. We recommend using a 1-1/8" hole in the deck or backsplash to accommodate the 1/2" supply nipples. For added convenience it is suggested that GINO mounting kit (MS9814-036) be utilized with Wall-mounted pantry faucet, refer to instructions.

1. Turn off water supply at main source.
2. Hand tighten all parts prior to tightening with wrench. Do not force parts together.
3. Handle plated surfaces with care, being careful not to scratch with tool.
4. Do not force parts together.

ASSEMBLE COUPLINGS TO SINK DECK
Apply Teflon Tape or Pipe Joint Compound to the supply line nipples. Place nipples through holes in deck. Assemble flange of each coupling to one nipple, then the other. Thread flange loosely against wall or backsplash.

ASSEMBLE FAUCET TO COUPLINGS
Carefully orient, mount and hand tighten the faucet to the two couplings. Be sure to include the washers provided. Use wrench to tighten flange against wall or backsplash. (Maintain alignment of faucet to sink while tightening). Now Wrench tighten couplings to faucet body, tighten flange against sink/backsplash.
