PERFORMANCE

A perfect cut

In developing the new range, all the cuts that the different disc and grid combinations offer have been studied in detail.

The new design of the machine, with tighter tolerances, together with the improvements made to the discs and grids, enables a **perfect result** whatever the product and the desired cut.

PROFESSIONAL
PERFORMANCE

5.5 and 8 litre cutter bowls

Sammic cutters and emulsifiers are available with a **5.5 or 8 litre capacity bowl** for grinding, mixing, kneading, etc. 3 or 4 kg of product, in seconds.

Cutting blades for each need

The cutter bowl is delivered as standard with a rotor with **toothed blades**. It can optionally be fitted with smooth and perforated blades.

Hub with toothed blades

The toothed blades are **ideal for cutting parsley and products with a high water content** that can be damaged using smooth blades. It is **also** good **for frozen products, nuts, cured ham, cooked meat, purees** (the puree is finer with this type of blade).

Professional performance

Cutter function

PROFESSIONAL
PERFORMANCE

Hub with flat blades

The flat blades are indicated **for cutting raw meat**, because the edge and its shape can easily cut the nerve strands and difficult points of the meat. They are also recommended **for vegetables in general**, as it chops very well with only a small quantity of liquid from the product. The smooth blades are **ideal for onions, although the Cut&Mix mixer must be used** because the product adheres to the sides of the hopper.

Hub with perforated blades

Use the perforated blades to **make sauces and mix products** such as **mayonnaise, seafood cocktail sauce, aioli garlic mayonnaise**, etc. as well as for certain types of **pastry dough**.

Speed selection

The available speed range **enables the machine to be adapted to the product being processed**, on the slicing as well as the cutting function.

Also, thanks to the brushless motor technology, the motor maintains the torque throughout the speed range, obtaining maximum efficiency at all times.

Brushless technology: maximum efficiency

Brushless technology is synonymous with **optimal performance at any speed.**

The variable speed cutters are equipped with high-efficiency motors using brushless technology.

Brushless motors are **highly efficient**, enabling the same force to be exerted throughout the speed range.

They also **weigh less**, require less space and, since they don't require ventilation, improve the **water tightness** of the machines.

Brushless technology: Force Control System

All models are equipped with the exclusive "Force Control System". The FCS screen shows the force made by the motor at all times. It also enables an audible warning to be programmed for when the machine exceeds the established force. The user therefore obtains the desired cut quality in each product and at all times, achieving an optimum and **uniform cut without shrinkage.**

Professional performance

Cutter function

PROFESSIONAL
PERFORMANCE

"Cut&Mix" mixer: a perfect result

The "Cut&Mix" mixer, standard on all models, **prevents the product from adhering to the edges of the bowl**, preventing the product from overheating and obtaining a more homogeneous final product.

Reverse function

Thanks to the reverse function,
the blades rotate backwards,
between 100 and 500 rpm,
mixing the product instead of
cutting.

This means that ingredients can
be added during the cycle and
mixed with the product already
cut.

Professional
performance

PROFESSIONAL
PERFORMANCE

Stainless steel motor block

The stainless steel motor block has a polished external finish and optimal durability. Also, it is easy to clean. The robust aluminium lid makes the entire unit highly durable.

Maximum

ERGONOMIC
EASY-TO-USE

Lateral product output

As the product exits on one side,
the cutters **require less space on
the work surface** and resulting in
optimal work flow in the preparation
area.

The product output opening is
designed to direct the product,
preventing splashing in the work
area.

Combination of safety systems

All Sammic cutters are equipped with a combination of safety systems that ensure user protection when the machine is in motion. The position of the head and its cover have **microswitches** that prevent them from being inadvertently switched on and the shut-off safety element prevents accidental start-up of the blades in case of power failure.

Maximum safety

The experience of a cutting specialist

Sammic has been designing and manufacturing cutters for more than 50 years.

Exports to more than 100 countries has enabled the company to standardise its quality.

Result: **#ThePerfectCut** for any product.

Sammic:
a leader's guarantee

A LEADER'S
GUARANTEE

Designed and manufactured in collaboration with chefs

Sammic's **corporate chef** and team actively participated in the entire Sammic cutter development project.

Before they are launched, all models are also tested by the corporate chef and by **Sammic ambassador chefs** from around the world.

And finally, a continuous feedback channel throughout the product's service life enables continuous improvement so that Sammic continues to be **#TheRightChoice** for users around the world.
