Durafurn® Function Chair (Vinyl)

To maintain the appearance, hygiene, and longevity of your Durafurn® Function Chair, please follow these recommended cleaning guidelines:

Vinyl Seat & Back

Daily Cleaning:

- Wipe down with a soft cloth dampened with warm water and a mild liquid soap.
- Rinse the cloth and wipe again to remove any soap residue.
- Dry thoroughly with a clean, soft towel.

For Stubborn Stains:

- Use a mild, non-abrasive cleaner or a diluted solution of dish soap and water.
- Apply with a soft-bristle brush or non-abrasive sponge.
- Avoid using harsh solvents, bleach, or ammonia-based products as they may cause discoloration or damage.

Disinfection:

- A diluted isopropyl alcohol solution (max 70%) can be used for periodic disinfection.
- Always test on a small inconspicuous area first and wipe dry after use.

Powdercoated Steel Frame

General Cleaning:

- Use a soft cloth with warm water and a mild detergent.
- Avoid abrasive pads or scouring powders that can scratch the finish.

Stain or Mark Removal:

- A soft cloth with a solution of vinegar and water (1:1) can help remove light marks.
- For more persistent marks, a non-abrasive cleaner suitable for powdercoated surfaces may be used.

Regular Maintenance:

- Check periodically for chips or scratches in the coating. Touch-up paint can be used to prevent rust in exposed areas.

Important Notes:

- Always avoid high-pressure cleaning equipment or steam cleaners.
- Do not soak the chair or allow water to pool on surfaces.
- Store indoors or under cover when not in use to prolong the chair's lifespan, especially in coastal or humid environments.

Durafurn® Function Chair (Fabric)

To keep your Durafurn® Function Chair looking great and performing well in high-use hospitality environments, follow these cleaning and maintenance recommendations:

Fabric Seat & Back

Routine Cleaning:

- Vacuum regularly using a soft brush attachment to remove dust and debris.
- For general surface dirt, use a damp cloth with a mild fabric cleaner or upholstery shampoo.
- Gently blot-do not rub-stains to avoid damaging the fabric weave.

Spot Cleaning:

- Mix a small amount of mild liquid detergent with lukewarm water.
- Apply with a clean sponge or soft cloth and gently dab the area.
- Rinse the cloth in clean water and blot again to remove any soap residue.
- Blot dry with a clean towel and allow to air dry completely.

Disinfection:

- Fabric-safe disinfectant sprays may be used sparingly-test first in a hidden area.
- Avoid oversaturating the fabric to prevent mildew or warping.

Deep Cleaning:

- Periodic professional upholstery cleaning is recommended for high-traffic venues.

Powdercoated Steel Frame

General Cleaning:

- Wipe with a soft cloth dampened with warm water and a mild detergent.
- Dry immediately to prevent water spots or streaks.

Tough Marks:

- Use a non-abrasive household cleaner safe for powdercoated finishes.
- Avoid abrasive pads, bleach, or strong solvents that may damage the surface.

Preventative Maintenance:

- Inspect for chips or scratches periodically.
- Touch-up paint may be applied to exposed metal areas to prevent corrosion.

Important Notes:

- Avoid high-pressure washers or steam cleaners, which may damage both fabric and frame.
- Do not allow moisture to sit on the fabric for extended periods.
- Store chairs indoors or under protective cover when not in use, especially in coastal or humid climates.
