Kryo: Always by Your Side

Available in two versions, the professional dosing grinders in the Kryo series are designed for the hospitality sector and are adapted to any type of grinding. The Kryo grinders ensure high performance and can manage large daily volumes and peak times, even over the long term, thanks to the quality of the materials and the longevity of the burrs. Easy to use and simple to maintain, they stand out on the market for their functional design and state-of-the-art grinding technology developed to protect the quality of the coffee.

HIGHLIGHTS

Micrometric adjustment

The micrometric adjustment device guarantees maximum precision in setting the desired grain size. An accidental anti-rotation lock prevents unwanted changes to the chosen configuration.

Steel burrs

Flat, 64-mm steel horizontal burrs with ThermoSteel treatment.

On-demand mode

Set the on-demand mode, which allows grinding to be paused, or choose the automatic mode. Grinding can be activated using the keyboard buttons or with the practical portafilter button that

2 VERSIONS

1

KRYO ELITE 65 OD

on-demand version

2

KRYO Evo 65 OD

on-demand version

is automatically pressed when the portafilter is hooked onto the fork.

Single, double, or custom dose

The settings menu is accessed via the digital display. Up to three doses can be saved by regulating the time: single, double, or custom (up to 30 seconds).

SAS: Smart adjusting system

Based on the parameters set by the technician during installation, Kryo Elite 65 OD automatically regulates the grinding time whenever the grain size is changed, thus always guaranteeing the same dose.
