Cold-chain
Catena del freddo

Ice cabinet represents an important element of ice-cream-shop cold chain.
After the batch freezer and the blast chiller, before or after displaying, it is necessary to maintain the ice cream at the right temperature. Practical and capacious, Ice cabinet can store up to 54 × 5 litres ice-cream containers. Moreover, it is useful to properly storage ice-cream containers during the night.
L'armadio Ice è uno strumento fondamentale per completare la catena del freddo in gelateria.
Dopo il mantecatore, l'abbattitore e prima o dopo l'esposizione è necessario conservare il gelato alla giusta temperatura. L'armadio Ice è pratico e capiente, in grado di contenere fino a 54 vaschette da 5 litri cad.
Utile per la conservazione notturna delle vaschette gelato.

Advantages
Vantaggi

High efficiency and low energy consumption thanks to high-density polyurethane insulation thickness.
Elevata efficienza e bassi consumi grazie allo spessore di isolamento del poliuretano ad alta densità.

Monoblock refrigerating unit easy to service and clean.
Facile manutenzione e pulizia dell'unità refrigerante di tipo monoblocco.

High storage capacity and space optimization.
Elevata capacità di stoccaggio e ottimizzazione dello spazio.

Easy internal cleaning thanks to rounded-corners and removable racks without the need of specific tools.
Facile pulizia interna grazie agli angoli arrotondati e cremagliere rimovibili senza la necessità di particolari utensili.
