IDEA HI-LINE RANGE

*The **Idea** you were waiting for
has now become reality!*

IDEA HI-LINE RANGE

The IDEA you were waiting for has now become reality!

New 5" Touch Smart interface, just one touch to scroll through screens, select a Chef program or set custom parameters. You've got the power: set parameters without limits, choose the vacuum level you prefer, the rest will be done by Idea Hi-Line.

Touch panel

Maximum usability

Smart sensor

Scratch-resistant display

Waterproof Display

5" Touch Smart panel
Top usability!

Selection of scrolling programs

Thanks to the intuitive scrolling interface you can easily select the Chef program of your choice, IDEA will do the rest.

Choose the parameters independently

Use your imagination: customize and save up to 10 vacuum programs. Set your creativity free and start your programs whenever you want.

You can always create a perfect vacuum

The sensor is able to vacuum pack any type of food, even the most difficult products (liquids, powders, etc), in a completely automatic way, to the maximum vacuum.

- › Marinade in bags
- › Marinade in containers
- › Infusions
- › Mussels and clams cleaning
- › Meat tenderising
- › Sauces
- › Pastry bases
- › Ice-cream bases
- › Powders and spices

- › Jars min
- › Jars Med
- › Jars Max

Pastry bases

Ideal for creams and sauces made with milk and eggs, which tend to foam quickly. The result is an even and glossy product.

Ice-cream bases

It enables the perfect preparation and packaging of different ice-cream bases to complex bases, such as pistachio and hazelnut, and those which contain dried fruit. 5 levels available.

Powders and spices

For packaging volatile products. It prevents powders from rising and coming out of the bag during the vacuum process.

Marinade in bags

Specific for marinating products, ensuring the marinade penetrates the product quickly and evenly. With only one short cycle, you get a result that may take more than 24 hours, working with the traditional method. Available for vacuum bags and rigid containers.

Marinade in containers

Specific for marinating products, ensuring the marinade penetrates the product quickly and evenly. With only one short cycle, you get a result that may take more than 24 hours, working with the traditional method. Available for vacuum bags and rigid containers.

Infusions

Automatic cycle to extract the most intense aroma from herbs and spices, reducing the oxidation of the product and extending the shelf-life. This special program will extract the richest aroma maintaining the essential oils and guaranteeing a unique and intense flavour.

JARS PROGRAMS

It packages delicate or soft products in vacuum-resistant rigid containers. There are 6 levels according to different types and quantities of product to be packaged.

Min - Med - Max

3 jar vacuum levels, adjusted according to the jar filling. If the jar is very full and there's only a little air to extract, select "Min", whereas if there's a lot of air to extract. These cycles are mainly used for cooking in jars: "Min" for liquid, creamy or canned products in oil.

Mussels and clams cleaning

Designed to clean and remove sand and internal residue from molluscs, preparing them perfectly for cooking.

Meat tenderising

Specific for tenderising meat and preparing it for subsequent sous-vide cooking. It creates different pressure intensities on the meat to tenderise it without losing weight or quality.

Sauces

Reduces foaming and spilling from the bag of sauces and products with a particularly liquid consistency. Ideal for tomato sauce, meat sauce and fruit juices.

12 CHEF AND JAR PROGRAMS

Heavy duty vacuum chamber
Hydroformed vacuum chamber made in a single piece without joints and rounded corners to guarantee smooth surfaces and easy cleaning

Sequential vacuum programs
They allow to realize and to automate special cycles for soft, porous and liquid products, and for food processing in vacuum (tenderize meat, wet-age, etc)

Smart vacuum sensor
Sensor control guarantees always a perfect packaging without configure any parameter and with no supervision

Vac-Norm ready
Vacuum can be extracted in gastronorm containers outside the machine

Touch panel
5" waterproof and scratch-resistant touch control panel

Accessibility
The unique opening system, with support rod, enables complete access to inner components

Printer connection
Idea Hi-Line can be connected to the printer for HACCP compliance

Easy vacuum
Thanks to the "Easy" accessory, completely stainless steel, it is now possible to vacuum pack outside the vacuum chamber by means of channelled vacuum bags

Gas Vacuum (MAP)
It vacuum packs even the most delicate and soft products! The gas will avoid any type of damage or breakage
